

WARNING :

- All the pneumatic tools should only be used as hand operated tools. They are powered by compressed air and are not insulated against electric shock.
- Always turn off the air supply and disconnect the air hose before changing or replacing any inserted tool and accessory.
- Before using these tools, make sure that all couplings and plugs are securely fastened. Air hoses which are under pressure may lash out when disconnecting, that can lead to serious injury!
- High sound levels may cause hearing damage.
- Always wear hearing protection when operating this tool.
- Wearing eye/face protection can reduce the danger of high-speed materials being emitted from the tool.
- Make sure that the direction of the spark generated from the cutting wheel grinding wheel or shank stone is properly directed so as to not create a hazard..

- Always wear gloves to reduce risk
- User must wear proper clothing.
- Loose clothing, long hair, stings, straps, belts and jewelry should not be worn when operating this tool.
- Long periods of prolong use will cause fatigue
- Periodic breaks are recommended for user safety.
- It is recommended to stop operating the tool whenever discomfort, tingling or pain occurs during use.
- Make sure there is no gas or combustible material stored near the tool when servicing, changing insert tools, or storage.
- Wearing proper breathing protection to avoid inhale dust or handling debris from working process, which can be harmful to the health.

m7'S SUCCESS IS A TEAM EFFORT!

m7 as it is affectionately called by thousands of users world-wide, is much more than just a good manufacturer of air tools. In fact, m7 provides a total brand solution for its air tool partners and consumers. m7's team is composed of a strong network of International air tool experts and an enthusiastic team of engineers, designers, marketers and administration personnel.

A STRONG BRAND LISTENS TO ITS CUSTOMERS

When we develop products such as our new, extremely small and handy air impact wrench NC-4610, m7 customers are our main driving force and focus. By building trust and excellent communication channels with our partners, distributors and channel customers, we very quickly get to understand what it is that they are looking for and what motivates their choice of air tools.

As a designer, manufacturer and distributor of tools, we are just as committed to bringing the most reliable, efficient, ergonomic tools to the market as we are to fulfill our promise of excellent service and support our clients.

AUTHENTIC POWER

EXPERTISE FOR A GLOBAL MARKET

MIGHTY SEVEN

m7 clients are very demanding and nothing short of excellence in product quality and fully committed support will do for them. We may sometimes feel that it is a lot to ask of a relatively new brand, but we embrace the challenge with open arms. We have been manufacturing tools for decades and our expertise in that field helps us better understand our clients' needs.

In terms of quality, we ensure that all the m7-branded products that we sell reflect our commitment to providing tools that are extremely reliable and perform. In order to achieve our standards of quality, our tools are tested thoroughly in our factory, using equipment such as computerized fatigue testing machines, digital torque testing machines, multi-functional testing machines, grinding efficiency testers, run-out testers, digital measuring projectors, environmental testing chamber, grinding and polishing machines, infrared tachometers, vibrations testers and decibel level detectors.

LEVEL IDENTIFICATION

LEVEL

The air tools in this section have been categorized into three distinctive levels for user convenience (for reference only).

Efficiency / Performance

Easy to use to handle tasks quickly, these tools embody efficiency and performance.

Strength

Tools provide high torque force, superior grinding power and high cutting energy.

Endurance

Built to last, product longevity and low failure rate are characteristics associated with these tools.

APPLICATION

Application icons have been designed to provide visual references that suggest industry specific features or usability. These application icons are for reference only.

GLOBAL EXPANSION

MIGHTY SEVEN

Although we have been in the industry for more than 2 decades, m7 has only existed as a brand for a few short years. Nevertheless, the inroads that we have made in many important markets, such as automotive, have led us to believe that our combination of great partner support and quality air tools is our key to succeeding.

m7 has made its bed and the focus is clearly on providing the right combination of marketing support, customer training and new product development as the way forward. When we print our slogan “greater partner support” we see it not so much as wishful thinking, but more as a m7 “truth”, a code by which we live daily.

GLOBAL EXPANSION

What do we check during an In-Process Inspection?

The In-Process Inspection (IPI) cover our whole production process including the raw materials, unfinished products and assembly. Our team of inspectors chooses a specific quantity of completed products, according to AQL tables (MIL STD 105E).

We inspect product appearance, workmanship quality, size measurements, weight check, functionality assortment, accessories, labeling & logos, packaging, packing and other tests and special requirements, depending on the product.

TORQUE MULTIPLIER

- Works with high transmission efficiency by planet gears
- 5:1 torque multiplication
- Multiplication accuracy $\pm 5\%$
- Supplied with 2 reaction bar styles

TM-0428-1 TM-0428-2

TORQUE MULTIPLIER

- Multiplication deviation less than $\pm 5\%$
- Mechanism with high ratio gearbox 26:1
- High ratios offer benefits without using long lever arms or heavy wrenches
- Supplied with 2 different reaction bar
- Durable construction without maintenance necessary and long lifetime

AIR BRUSH KIT

40 pieces in one carton

CONTENTS

- +1 Airbrush
- +1 22c.c. Glass Jar
- +1 50c.c. Glass Jar
- +1 55FT(M5*0.45) Air Hose
- +1 Adaptor
- +1 Holder
- +1 2c.c. Cup
- +1 8c.c. Cup
- +1 Spanner

FEATURES

- Double-Action Trigger can control the amount of paint.
- Included Airbrush Holder can be placed when idle.
- The air volume can be adjusted through the adjustment button.
- Light-Weight and Ergonomic body can be easily operated with one hand.
- 0.3mm Ultra-Fine Nozzle can easily handle details.

SZ-212A

AIR REGULATOR

FEATURES

- Used to adjust the air inlet flow of pneumatic tools
- Easy to mount

FEATURES

- The body is equipped with two sizes of adapters, which can use 19.6mm thread and 33.6mm thread head Grease Tube.

SG-902

Grease Tube Adapter

MOQ. 50 pieces

FEATURES

- SG-902 is a double size adapter that can be combined.
- This 2-in-1 adapter can be used with most grease guns that require a grease tube.
- This adapter can be connected to oil tanks with 19.6mm thread and 33.6mm thread head Grease Tube.

DIGITAL TORQUE TESTER
Torque Range 0~14.7Nm (0~150 Kgf.cm)

- Proved by the life-time tester, these items can be operated continuously up to 1.5 million times.
- Industrial grade, excellent for long continuous operation on various mass production lines..
- Low noise and vibration rate, high adjustable accuracy up to + - 5%.

- Metric and inch spindle design can meet accessory demands in every market.
- Spindle lock enables easier accessory changes.
- 100 degree design enables easier operation.
- Heavy duty air cooled spiral gears and double bearings for durability.
- 360° Swivel Wheel Guard.

Air Oscillating Tool With Universal Adapter
Air inlet : 1/4"

20 pieces in one carton

Note: Blade is not supplied along with the tool

FEATURES

- With Patent Flange, suitable most air Knife/Multi-Cutter Blade
- Extremely light weight, only 0.67 kg
- Low consumption, only 1.9 CFM (General 5 CFM)
- Only 1/3 size to most of oscillating tool on the market
- 360° adjustable exhaust cover
- Rubber sleeve provide absolute comfort feel and also reducing vibration

Patented flange can share pneumatic scraper & electric grinder blade.

- Proved by the life-time tester, these items can be operated continuously up to 1.5 million times.
- Industrial grade, excellent for long continuous operation on various mass production lines..
- Low noise and vibration rate, high adjustable accuracy up to + - 5%.

SPRING BALANCER

SP-3400 SP-3500

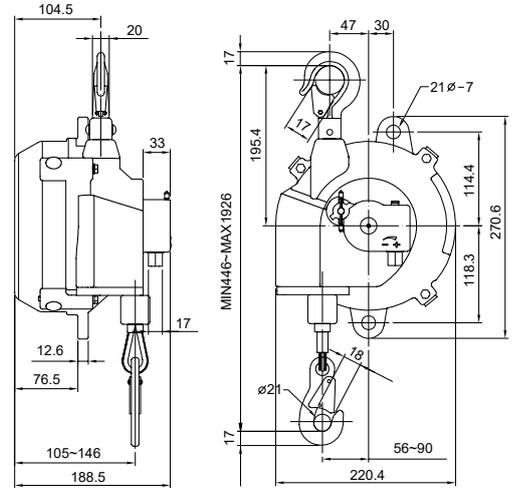

- Spiral design.
- Increasing screw diameter is balanced by increasing spring force so that the output force is balanced and the tool stops at wherever it is pulled.

Safety Note

Please note the following safety notes to avoid malfunctions, damage or physical injury:

- Please observe all safety notes of the used driving tool (drill)
- Always switch off the driving tool and pull off the power plug before maintaining the blind Riveting attachment, e.g. changing the nosepieces or when not in use.
- Only use the blind bolting attachment as indicated in this manual for setting blind Rivets. The unit is not designed for continuous, professional use.

User's Manual of Air Impact Wrench

Working environment:

- Using these tools in any potentially explosive environment is strictly prohibited.
 - It is always recommended that these types of tools must be operated when standing on a solid or firm location.
 - Always use these tools in a well ventilated area.
- Slipping, stumbling and falling are the major causes of potential serious injury, therefore, a clean and clutter free surface in the working area before operating the tools is strongly recommended.

Air supply and connection requirements:

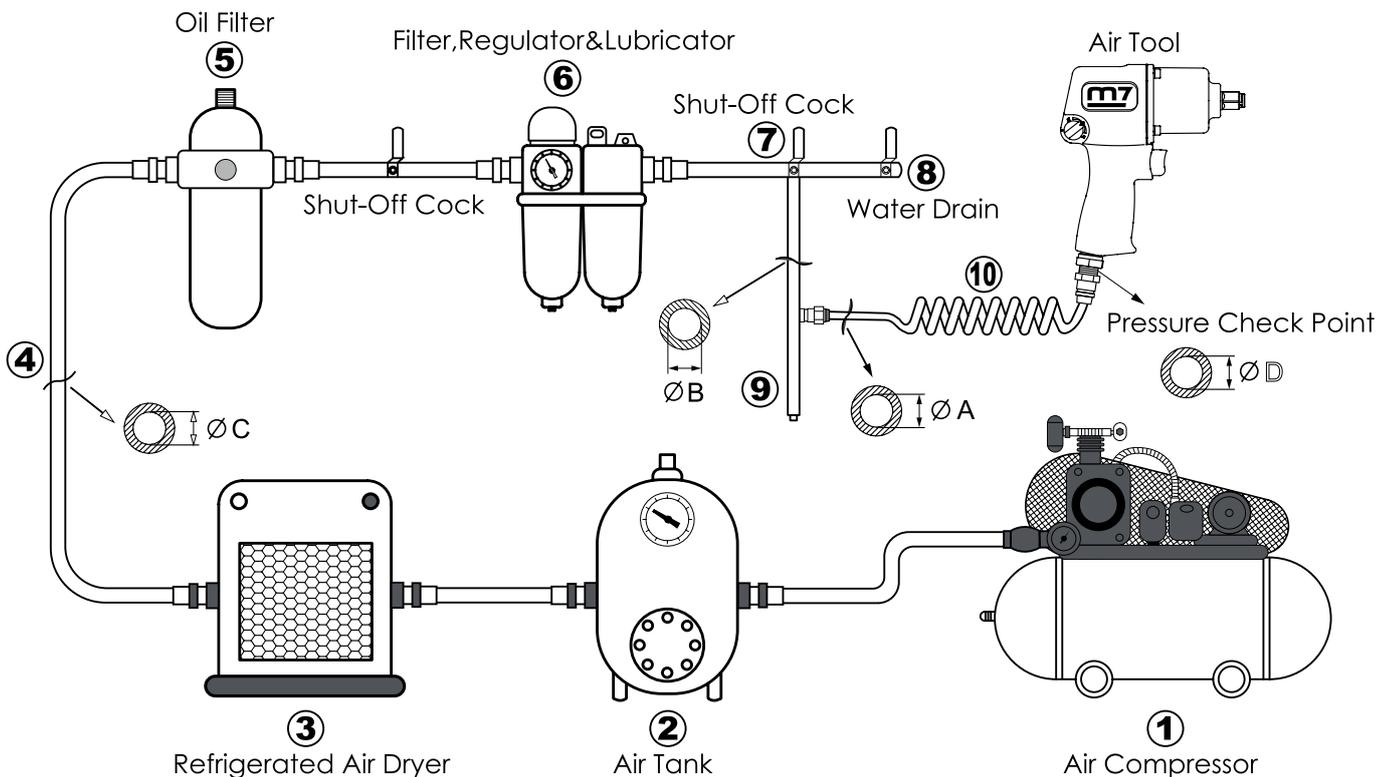

- The maximum recommended air pressure during operation must not exceed 90 psi (6.3bar). Higher air pressure may create unsafe operating conditions for the tool and the user.
 - The compressed air should be cooled and have a water filter installed at the outlet end of the compressor. Even with a water filter installed, some water may still condense in the piping or hose and will enter the tool mechanism causing premature damage to the tool. Therefore, it is recommended to install an air filter-lubricator device somewhere between the tool and the compressor.
 - Always use an air compressor of the proper capacity to operate each tool.
- Clean the hose with a blast of compressed air before connecting the hose to the air tool. This will prevent both moisture and dust inside the hose from entering the tool and causing possible rust or malfunction.

Air Tool Repair Kits

M7 provides specialized repairing tools for your after market need

Ideal system connection

Piping diameters and length requirement:

- The diameter ΦA required for the inlet pipe (10) is recommended on the specification table.
- The diameter ΦB required for the branch pipe (from 7 to 9) should be 2 times as large as ΦA . $\Phi B = 2 \times \Phi A$
- The diameter ΦC required for the primary air supply (from 1 to 8) should be 3 times as large as ΦA . $\Phi C = 3 \times \Phi A$
- The length for the inlet pipe (10) should be less than 15 feet (4.5m).
